

Cleaning of polycarbonate glazing on rooflights and canopies:

- ✓ Use mild detergents and warm water.
- ✓ Non-abrasive cloths are to be used if necessary.
- ✓ It is advised when cleaning any rooflight that you should always assume that they may be fragile and you should never walk, lean, or stand on, or lie across them.
- ✓ Suitable fall protection measures should be in place in accordance with Health and Safety regulations.

Cleaning of kerbs/aluminium framework:

- ✓ Use warm soapy water.
- ✓ Rinse with clean water.
- ✓ Dry with a clean cloth if required.
- ✓ Free any debris / leaves etc. from bottom of pitched glazing.
- ✓ Do not use a pressure washer in any circumstances.
- ✓ Any mechanical components should be checked regularly and lubricated if necessary.
- ✓ Automatic electrically operated vent units should be tested every 6 months, any mechanical components lubricated if required, any electrical components replaced if damaged.
